Strengthening Wildlife Enforcement Networks (WENs)

**2019
Development of Guidelines to
strengthen WENs**

**2019

WENs**

**2019 + 2020
Implementing WEN
Guidelines in South America**

**2019 + 2020
Targeted support for WENs
globally**

Why develop the WEN Guidelines?

- Call for
 - enhanced regional responses
 - more effective responses (best practices, strengths and weaknesses)
 - guidance on possible ways to make progress
 - a standardized, repeatable approach
- Objective: identify key elements and guidance to consider when developing or strengthening a WEN, tailored to your region

The WEN Guidelines

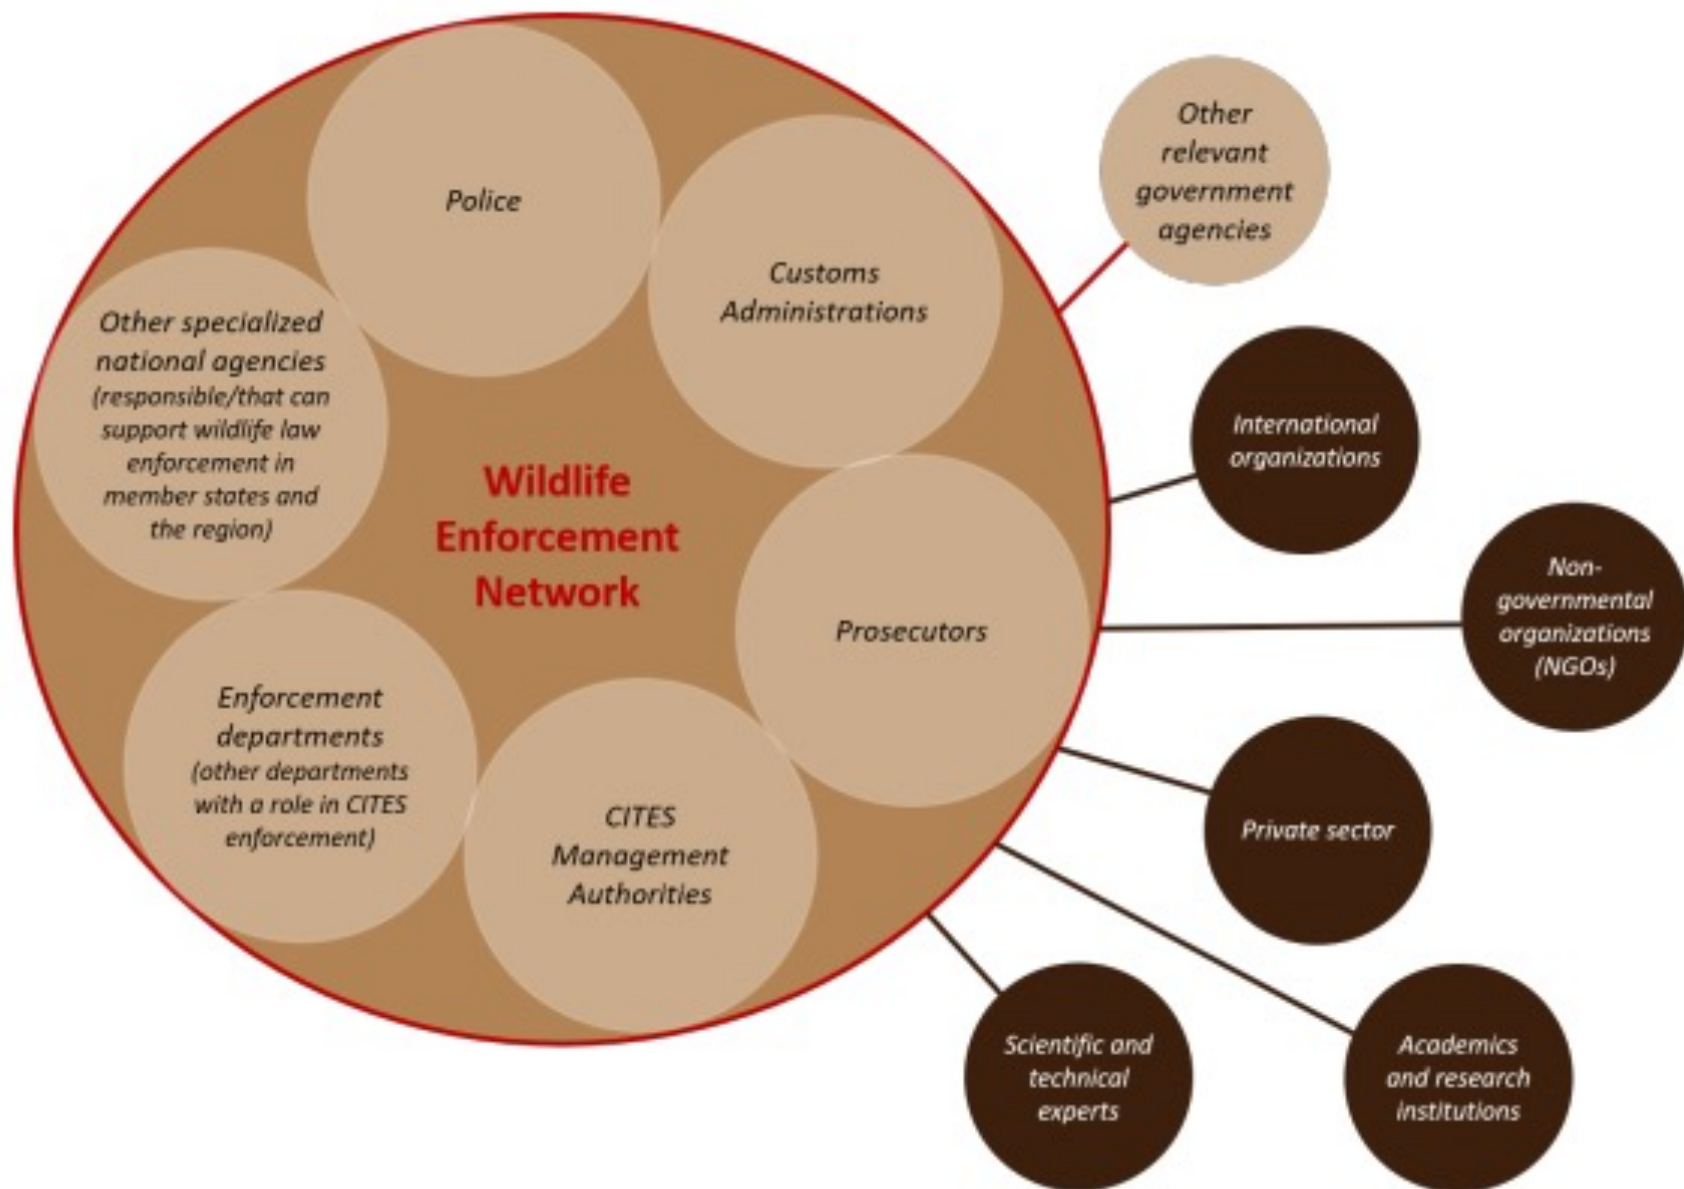

- **Guideline 1** - Establishing a new WEN outlines a checklist of the key considerations to be taken into account when establishing a new WEN, including associated actions, advice and suggestions on “How to do it”, in the event a key consideration is not met.
- **Guideline 2** - Strengthening an existing WEN provides an Evaluation Matrix, to allow a WEN to measure its progress, maturity, and increased capacity, and further provides suggested actions to further that development.

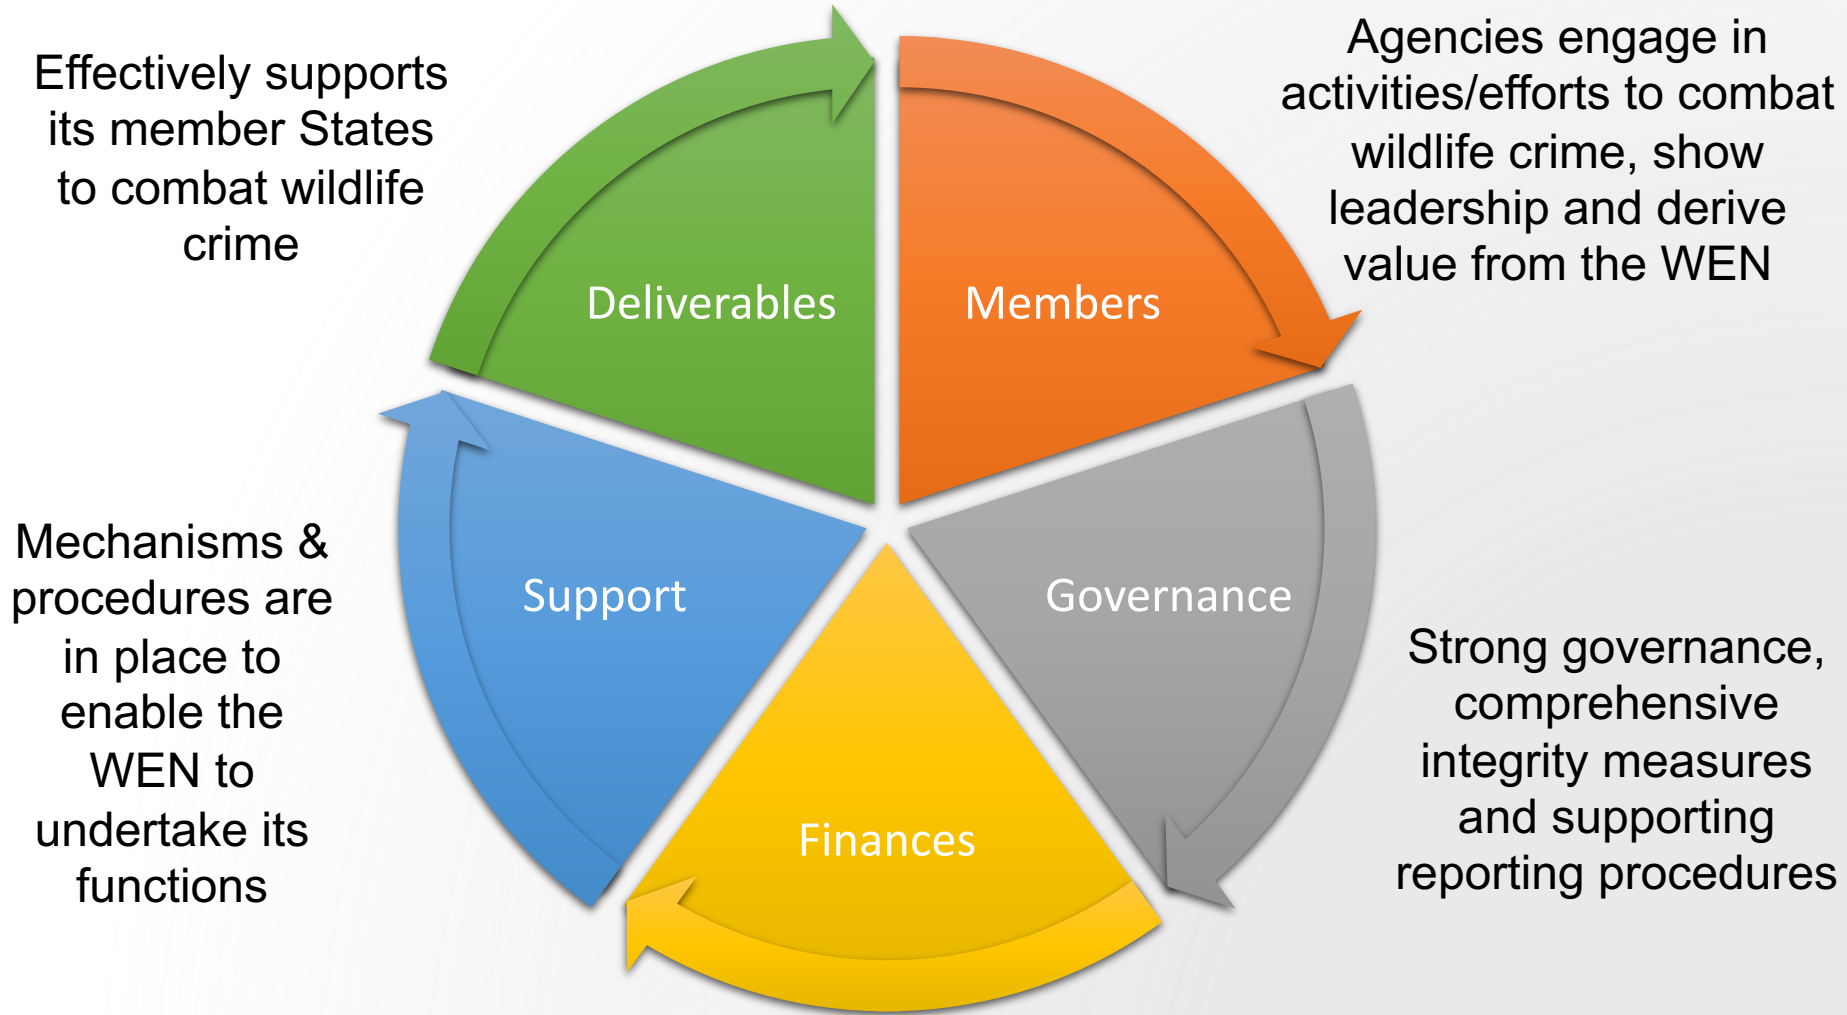

What are the main goals of a well-established WEN?

- Build cooperation between agencies responsible for wildlife law enforcement
- Facilitate standardized regional approaches
- Support and encourage coordinated efforts and participation of member states in operations combating wildlife crime
- Share experience, skills and information
- Exchange intelligence and risk data
- Support capacity building efforts
- Ensure all actions, products and deliverables of the WEN are aimed at more effectively combating wildlife crime.

The WEN Guidelines

- **Guideline 1** - Establishing a new WEN outlines a checklist of the key considerations to be taken into account when establishing a new WEN, including associated actions, advice and suggestions on “How to do it”, in the event a key consideration is not met.
- **Guideline 2** - Strengthening an existing WEN provides an Evaluation Matrix, to allow a WEN to measure its progress, maturity, and increased capacity, and further provides suggested actions to further that development.

Core Categories	Key Considerations
<i>Members</i>	1 – Leadership 2 – No duplication of efforts and structures 3 – Communication structures
<i>Governance</i>	4 – Accountability and reporting systems 5 – Integrity measures
<i>Finances</i>	6 – Government support 7 – Sustainable funding
<i>Support</i>	8 – Secretariat
<i>Deliverables</i>	9 – Support, operational activities and awareness

Core categories and key considerations
when establishing a new WEN

- **Checklist** of key considerations
- Associated **actions**, **advice** and **suggestions** on “**How to do it**”

1. Leadership

Leadership, in the form of network champions or ambassadors, is useful for all networks but especially those with more informal structures. Greater formality encourages participation by national member governments within the region. In addition, enthusiastic potential members should be encouraged in finding ways to contribute to the WEN.

Key considerations

1. Having clearly identifiable WEN champions.

How to do it

1. Secure support from senior position holders and **WEN ambassadors** (including the leadership of WENs from adjacent regions, heads of INTERPOL National Central Bureaus, heads of CITES Management Authorities, and other relevant National Law Enforcement Agencies), to promote the WEN.
2. Identify a proposed **WEN chair** and include provisions that will facilitate rotating the holder of the position across the nations within the network's region.
3. Establish a foundational group of WEN champions, and encourage them to reach out to relevant WEN contacts to establish broader stakeholder interest.
4. Have a 'declaration of intent' signed by the senior position holders and WEN ambassadors, in which they are named and identified, and that may be used for future communication purposes.
5. Engage the foundational group of WEN champions to build momentum based on success.

Key considerations

How to do it

2. Having mechanisms that engage and encourage contributions by agencies and key personnel to the WEN.

1. Establish clear roles and responsibilities for members, especially the leadership and secretariat.
2. Develop memoranda of understanding for the WEN across nations within the region.
3. Put in place nominated project or activity leads, and/or a pilot (trial run) host agency.
4. Encourage all potential members to contribute to the WEN.
5. Upon establishment of the WEN, communicate its establishment to other WENs, intergovernmental organizations and any other relevant stakeholders.
6. Report on and raise awareness of the activities conducted by the WEN.

3. Having mechanisms and social media channels for public recognition and acknowledgement of WEN leaders

1. Consider putting in place reward and recognition schemes for those showing active leadership.
2. Collectively decide on 'media embargoes' and the coordinated release of press articles at the same time.
3. Where possible, leverage and link to existing member agency media platforms.

Consideration of all key recommendations will

- Ensure all relevant key elements that are needed for a WEN to succeed (*Members, Governance, Finances, Support and Deliverables*) are explored from the outset
- Enable you to develop and create a solid foundation for the WEN and identify key priorities/actions
- Guide the development of a tailored regional network that suits your region's needs

The WEN Guidelines

- **Guideline 1** - Establishing a new WEN outlines a checklist of the key considerations to be taken into account when establishing a new WEN, including associated actions, advice and suggestions on “How to do it”, in the event a key consideration is not met.
- **Guideline 2** - Strengthening an existing WEN provides an Evaluation Matrix, to allow a WEN to measure its progress, maturity, and increased capacity, and further provides suggested actions to further that development.

Guideline 2 – the WEN Evaluation Matrix

- To assist evaluation of maturity and/or operational performance. It establishes a benchmark against which WENs can aspire to become ‘well performing’.
- Contains a progressive scale of maturity for the 5 categories (Members, governance, finances, support, and deliverables) and identifies what needs attention

- Objective: a well performing WEN.
- The guidelines will help you identify
 - levels of development, maturity and strengths
 - Areas that may benefit from additional effort
 - Indicative effort/resources to reach the next level of development, maturity and strength
 - where the WEN is meeting objectives and achieving successes

1. Members – Outcome Statement:

National agencies responsible for wildlife law enforcement actively engage in WEN activities, are engaged in combating wildlife crime, show leadership and derive value from being in a WEN.
